1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over prior art Figs.

3-4 in view of Brancaleone and France (1364800).

3. The claims are considered to be met by the prior art Figs. 3-4 except that the prior art does not show a cover piece which arranges on the first side of the glass stopper to surround one pin and being connected with metal sleeve. Brancaleone, Figs. 1-3 show a connector having a cover piece 20, prepared by stamping, surrounding one of pins 34 and in connecting with a metal sleeve 12. Also, France, Fig. 1 shows a cover piece 3' arranged on one side of glass stopper 2 and flushed with the glass stopper. It would have been obvious to one with skill in the art to modify the connector of the prior and Fig. 3-4 by providing the glass stopper with a cover piece which has features as described above, as taught by Brancaleone and France (800), in order to ground the pin of the connector.
